However, even with this in mind, it is wise to budget approximately £500 for costs over the course in the coming year.</p>

Equipment/materials recommended	During the three years of the course you will need, and want, to purchase digital equipment. We advise that, for the moment, you don't purchase expensive computer equipment until you've received our recommendations for the specification of hardware and software.
Visits	In the second term we run a study trip. You will find that some of the buildings and exhibitions that we see on this relate both to your design projects and essays and we hope that you will find the trip inspirational. We will provide further details of the itinerary, the costs and the ways in which the trip is to be arranged later in the first term. In previous years trips have been to Rome, Vienna, Berlin and Paris. Field trips inside the UK are sometimes free, but you are likely to be expected to pay the cost of travel associated with these field trips, such as travelling to London for an exhibition for example.
